

FÖHL ROADMAP

Adolf Föhl GmbH + Co KG has been working for over 20 years on **energy efficiency** and **environmental protection** goals. Föhl was the first foundry to become climate-neutral from 1.1.2020, and will not leave a CO2 footprint in the future. The following resource-saving technologies are exclusive to Föhl:

The Föhl **hot runner technology** for zinc uses significantly less energy ...

The nano-coating with zinc die casting parts with **Föhlan** is a green alternative to galvanic and brings many advantages ...

Have we got you interested? Get in touch - we'd love to help you!

2020 Climate Neutral Production
